Dear Readers,

Greetings to you!

We are pleased to present, "Alagappa Waves" e - magazine of our Karaikudi Alagappa Group of Educational Institutions. It has been beautifully said, "A flower makes no garden". Our e-magazine is not the outcome of the effort put by an individual, but the outcome from immense efforts put by our whole group of dedicated and motivated students under the guidance of our respected staffs and trust members. We're thankful for the sincere work of the designing team that has added some pizazz to the contents. Undoubtedly, the issue that you are reading now contains not only the exhilarating events that happened in 2020, but also some wide range of informative and inspirational articles about women empowerment and humanity. It also recollects the flashback of the Students' achievements in various fields. Hope you'll enjoy reading the "Waves of Alagappa", and spare some time to ping us your feedback.

Happy Reading!

Dr. RM. Alagappa Chettiar - our beloved legendary icon

Dr. Alagappa Chettiar loved the company of children, as much as he loved educating them. His daughter, Dr. Umayal Ramanathan recalls,

"His vision was that every child who enters the Alagappa campus should be able to fulfill their academic ambition. We should provide for them a wide spectrum of academic programs that they should never seek other institutions to further their education".

Alagappa Chettiar, schooled in Karaikudi was determined to further his education and go to College, but his father who was in Malaysia wanted him to come and learn the family's money lending business. Put on a ship to Malaysia against his will, in a state of depression, a life changing moment took place when he developed high fever and the Captain thought he had typhoid and took him off the ship. Once off the ship he contacted his Uncle and begged him to tell his father to allow him to study in College. A ray of light shined on him as his father agreed. Being a class-topper he applied for admission to the top College in Madras – The Presidency College. However College had already started so he could not get admission. A determined young man that he was, he went to see the Principal and pleaded for a seat. The Principal said "Here is the rostrum of the incoming class from 1 to 40 so I am sorry there is no seat available" Immediately, displaying his presence of mind and sharp intellect he responded "Sir, zero is available". Looking at this anxious young student the Principal could not refuse admission and said "You are a smart young boy I will

give you a seat". That was a phenomenal achievement and the start of one of the most dynamic careers of an individual who used every moment of his life to do something constructive and meaningful. While in College, he was fortunate the philosopher Dr. Radhakrishnan, who later became the President of India as his teacher. He did not fall slave to the typical fantasies of College students such as movies, parties and other entertainment. He formed the Triplicane Debating Club and got a team of like-minded students to meet in the evenings and debate world politics, economies etc. When he died at a tender age of 48 years in 1957, he revolutionized his native place of Karaikudi by buying a 1,000 acre jungle and converting it into a citadel of learning offering education from Kindergarten to post graduate education in a broad spectrum of academic curriculums. Today more than 30, 00,000 students have graduated from the various institutions that he built in Chennai and Karaikudi. The Alagappa Campus continues to grow with the Alagappa College of Nursing to be opened this year.

- *Dr. Ramanathan Vairavan*

Dr. Alagappa Chettiar's – Untold Story

Why do we call him a vallal?

"Despite being religious, he was not a temple- goer nor did he donate to temples of worship. His temples were the towers of education and his donations were mainly aimed at expanding curriculums and helping the less fortunate "

While there are lots of individuals who are philanthropists and have helped the poor we still call just this single legend as a vallal. Do you know for what reason do we consider him as a vallal? It was his passion to help those in need and he continued that right through his life. All the riches that he gained through his sharp business acumen were all spent for the welfare of the community. When he died he left nothing to his only daughter but a legacy that the whole community is thankful and proud of.

Along these lines, here's a delightful incident of Alagappa Chettiar that demonstrates why we consider him as a vallal. As he got drawn into building a galaxy of educational institutions in Karaikudi single handedly, he sold one business after the other and soon started falling short of funds to build the next institution. One fine day, Alagappa Chettiar, vexed in his home at Kottaiyur debating how he would raise one lakh rupees to complete another one of his projects with only Rs. 10,000 in hand. In 1940's the sum one lakh rupees is around equivalent to one crore these days, so envision what sort of pressure he had experienced. Out of nowhere a man suddenly entered and begged him for help. He looked depressed and he told that only Alagappa can be

his saviour and narrated his story. He told that he had arranged marriage for his beloved daughter, for the arrangements, he was about to borrow ten thousand rupees from someone who agreed to offer him the money. But, unfortunately due to certain reasons that person declined to offer him the cash. So he was worried about the circumstance, and he doesn't have a clue of what to do. As compassion was a major attribute of Alagappa Chettiar he beckoned his assistant to bring the ten thousand rupees that he had and offered it to that person, telling him to organize the marriage joyfully and he also told that he'll definitely attend the marriage. The man was exuberant, cried profusely with joy, thanked Alagappa Chettiar and went on to get his daughter married. As the man left, his assistant asked Alagappa Chettiar, why did he give the only cash that he had? Alagappa Chettiar spontaneously answered that, "If I had that cash with me, I don't know whether it would solve my immediate need. But, his need was greater so I offered the cash to him. His little girl will be getting married. What's more, his whole family would be happy and cheerful". Vallal means a person of munificence. Alagappa Chettiar's munificence was unbounded and that is why such never ending sagas of Dr. Alagappa Chettiar inspire me and demonstrates why Dr. Alagappa Chettiar alone is called a vallal.

- C. PRIYADHARSHINI, Department of English, Dr. URCW.

Women Empowerment

*AN INTERVIEW WITH AN ACCOMPLISHED WOMAN IN LEADERSHIP –
DEVI ALAMELU VAIRAVAN*

Devi Alamelu Vairavan is a dynamic practicing attorney in New York, USA and trustee of the Alagappa Group of Educational Institutions in both Karaikudi and Chennai. She is a dazzling woman who has proven track record of success early on in both the US and India. Many of us know about her accomplishments and that she is also the great-granddaughter of Vallal Dr. RM Alagappa Chettiar, but beyond this is her adoring, inspiring and one of a kind personality.

What is one of her biggest goals?

Her biggest goal now is to open a law college and a medical college in Karaikudi, and enhance educational opportunities and access to it. She was always inspired by the fact that her great-grandfather became a Barrister-at-law, and believed there was tremendous value gained from learning the skills of problem solving and being an advocate regardless of whatever career is pursued. She further realized that it was her great-grandfather's dream to bring a medical college to Karaikudi and feels strongly about delivering on that dream and is prepared to do everything she can to support her father in doing it.

- *Devi Alamelu Vairavan*

What is her mission in life?

Her mission in life is to follow the footsteps of her great-grandfather, just like her grandmother, Dr. Mrs. Umayal Ramanathan and just like her father, Dr. Ramanathan Vairavan and help serve as many people in need as possible. Do you see a resemblance with any of the three heroes in her family? Or is she the mixture of the three? She describes the importance of the journey in finding life's purpose and the fact that for her, early on she watched her father, who is a global business leader, dedicate his life to helping others and doing it with such poise and empowerment that she similarly knows that is her path.

How did she succeed in another country as a young Indian woman?

With a smile she replied that, "I succeeded anywhere I went because of the values my parents instilled in me, and the fact that I was driven by my passion. I knew I had to work hard, be a good person, care about the work I do and be confident in order to succeed."

Did she ever face resistance while leading men?

Yes! But she acknowledged not to worry and that this is the time to feel proud and optimistic about being a woman. The culture and standards are changing, but it's still up to us to ensure the enforcement of our equality and respect. Together we can continue to create a culture where voices are heard and we are respected. She described how this is a continuing issue facing women, and one that she faced even more so early on in her career. She said "make sure you do not get discouraged when there is push back with your leadership or involvement, or if you do not gain immediate respect as a woman; that is the time to continue to make your presence known and continue to make your points heard. You are your own person, and you have something to offer at the table! It is best to keep your seat at the table, focus on your point and reach a common

ground, rather than get distracted by whether you are being liked at the time. Don't be afraid to disagree with a point or bring new ideas forward, but always remember to be respectful and professional. In due time, you will see that you are in fact respected for your ethics."

How did she move forward when everyone else kept telling her that she couldn't?

She explained that she remained positive and persisted. She described how behind almost every successful person is a group of people, who have at some point in their lives said, "You will not succeed" "your idea will not work" or "you cannot do this". In fact, she described that people can tend to give a long list of reasons why you should not do something because often times they cannot fathom themselves doing it. But, she says that should not stop you and we should not internalize those words and that we should instead recognize what is constructive advice for us to better ourselves and begin taking action. The key is to keep trying and make a conscious effort to replace negative thoughts with positive ones. Your mind is a powerful tool, and believing you are powerful is being powerful. You have to trust yourself before you can convince anyone else to trust you! She says not to listen to advice that demotivates us and that we should instead surround ourselves with positivity and a supportive environment. She encourages us to also be that support system for someone else, especially friends and family.

What was her biggest strength and weakness?

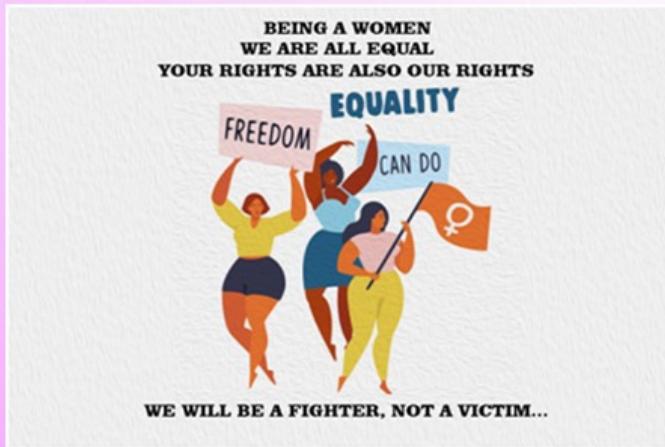

Her biggest strength as a woman is that she is a good listener and problem solver. She realizes that we must take the time to be there for one another and always be respectful of each other's feelings and she takes pride in prioritizing that. Her weakness is that she can be a perfectionist and can spend too much time focusing on small details.

other. At the end of the day, each of us has a purpose in life, but by bettering ourselves we make the team of sisterhood so much stronger. Make sure other women have access to the beneficial information that you have and always remember to send positive messages to one another to empower and encourage each other. Ultimately, enjoy what you are doing in life, and make sure you are having fun. It may feel uncomfortable at first to find your voice and stand up for yourself, but once you do, that's when the world will be thankful for you.

Interviewed by:

DR. URCW., Karaikudi.

Being a Woman

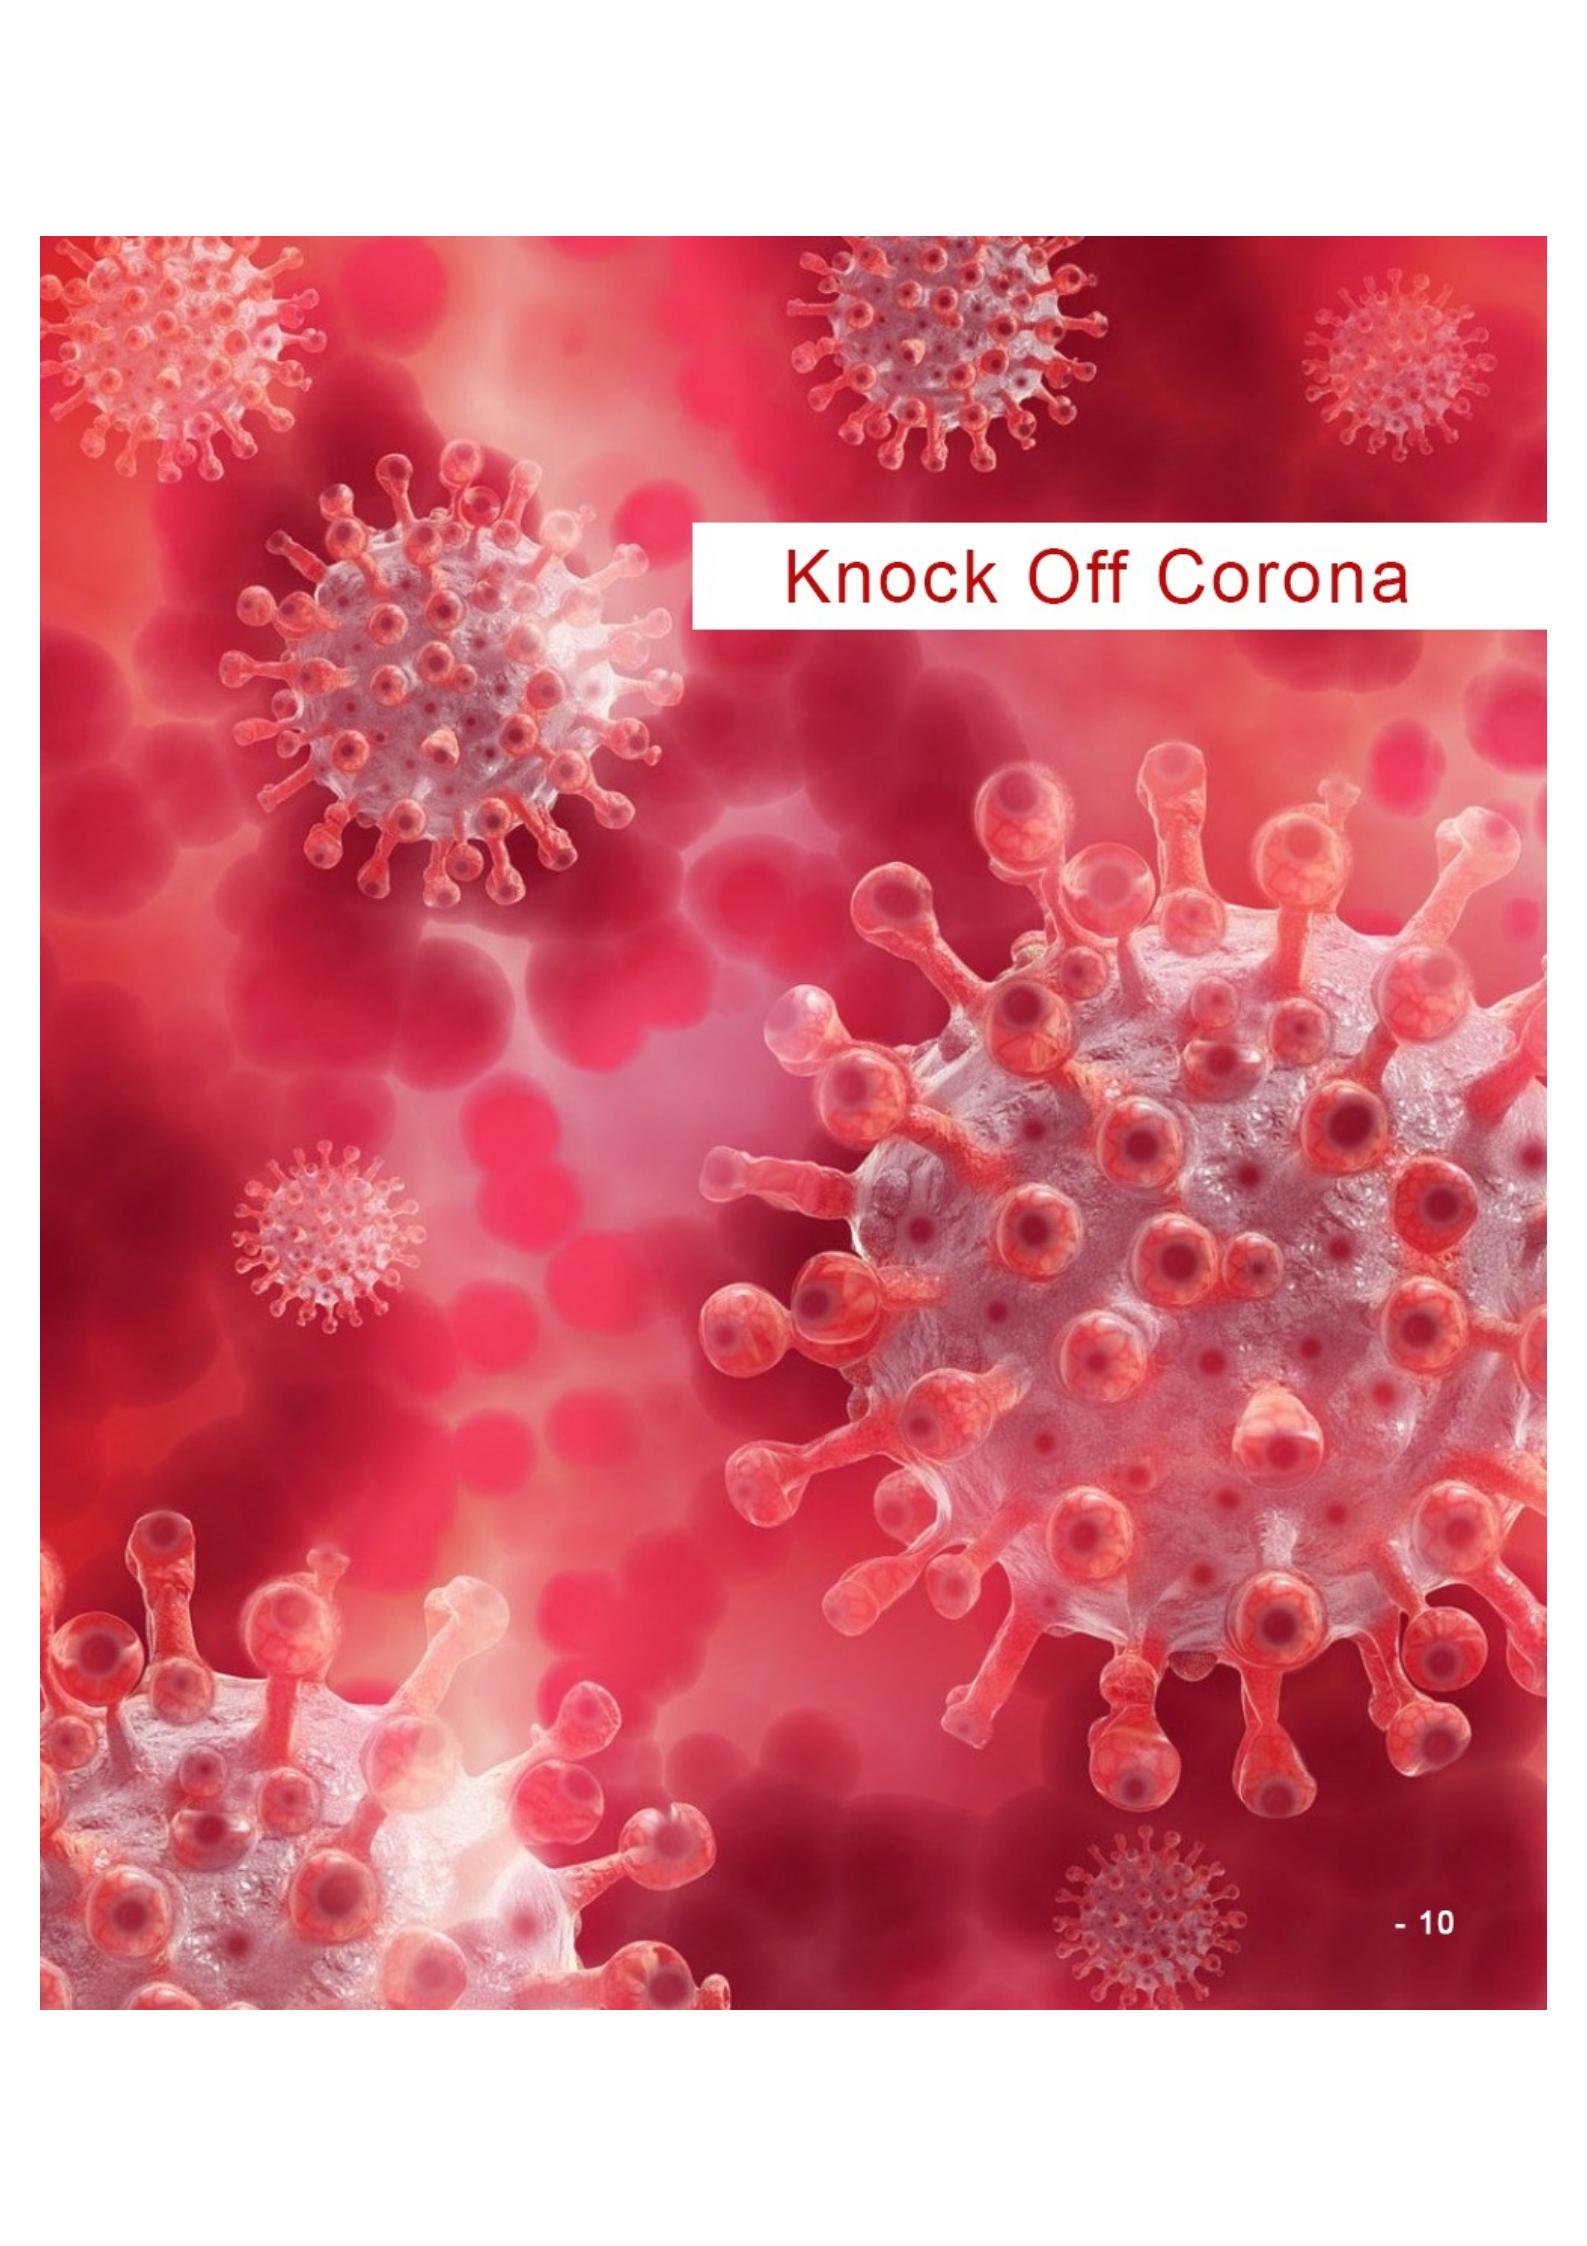

Being a woman we are facing many problems by this society both mentally and physically. One of the important taboos is speaking about periods, it is a normal word in other country yet; in India they are considering it as unholy thing, they won't realize that periods is a powerful element gifted by God.

The next problem which a woman gets targeted is sexual abuse. Sorry I should not mention that sex abuse is for women it is to the female gender irrespective of whatever her age may be When one girl or women gets abused by male; mongers society won't support her inspite they start to criticise her character.

It is a common question - Why a girl is always taught to stay within her limits? Why isn't a man taught to respect her?

From now, raise your voice against those men who tear female into pieces! My dear sisters out there, let's suppress these men to the ground & pledge - "We are strong enough to defeat them, & no longer have to be quiet"

BE A FIGHTER! NOT A VICTIM!
- V.MEGALAI, Department of English

Knock Off Corona

WHAT SHOULD THE TEACHER AND STUDENT DO

SOCIAL DISTANCING:

- Keep a distance of at least 1.5 to 2 meters.
- Circumvent densely populated areas while travelling from home to school.

PROPER HYGIENE:

- Indulge in proper intake of healthy vegetables and fruits.
- Consume hot water 8-10 glasses per day.
- Do yoga and aerobic exercises regularly.

PRECAUTIONARY MEASURES:

- If a student is having high body temperature, he/she should be preferred to go to a nearby health clinic.
- Students must use handkerchief or tissue paper while sneezing and coughing.
- Wash your hands with soap sanitize frequently
- Disinfect yourself when re-entering into your house.

USAGE OF MASK AND GLOVES:

- It's mandatory to wear mask and gloves at all times.
- Don't re-use the mask if it's not re-usable.
- Dump the used mask and gloves in the trash can, instead of throwing it away.

Father of Sociology - Auguste comte

WHAT SHOULD THE SOCIETY DO

FOLLOW AND LISTEN TO WORLD HEALTH ORGANIZATION -WHO GUIDELINES:

Properly wash your hands more often, avoid crowded spaces and handshaking. If you are sick, wear a mask and seek medical attention immediately.

EDUCATE YOUR FAMILY, FRIENDS AND COMMUNITY:

Spread community awareness both online and offline. For example, look at how the Scouts are raising community awareness around the world and how the "Ndlovu Youth Choir" in South Africa exploited music and dance to dismantle myths about Corona virus. Unfortunately, fake news spreads so fast in times of uncertainty. So be responsible. Verify every news and information before sharing. Be a source of calm during this pandemic.

VOLUNTEER:

Find opportunities to volunteer in your community. If there are older people or immune-compromised people, help them out. Help out vulnerable people in your community to pick up their groceries and medicine. Healthcare workers around the world are called to work in high demand and they might need your help looking after their children or looking after their parents while they attend to life-saving work in clinics and hospitals around the world. This example shows how young people in India, London, UK and many other countries are helping out the elderly.

DONATE:

Find a reliable charity to donate. For instance, The United Nations Foundation just launched a Corona virus response fund. You can also support other campaigns such as "Stand together to beat Corona virus" by

Father of Electricity - Benjamin Franklin

Global Citizen urging that the G20 countries contribute financially to strengthen efforts by the World Health Organization.

HOLD YOUR GOVERNMENT ACCOUNTABLE:

Advocate for free testing, reliable information, investments in science and Universal Health Coverage.

- A. HEMANTH AYYARU, AMHSS

Father of Modern Biochemistry - Carl Alexander Neuberg

IMPACT OF COVID-19: EDUCATION FIELD

IMPACT OF COVID-19: EDUCATION FIELD

"HEALTH IS WEALTH", as this famous proverb saying, Health is a voluminous riches one can hold on, we are abundantly blessed enough to retain with the sound health, and so undoubtedly we are indebted to The Almighty. Every time health stands first in our priority list for everyone whom is why our government has announced so many lockdowns just to safeguard ourselves from this deadly disease. I lapped up in the statement "Parents are the first teachers and teachers are the second parents". Education takes a birth in us, even before we take our birth into this world. Yes ...We had been started educating by our mother's touches and talks when we were inside her womb. Then with the help of our mother and gynecologist we learned to struggle to step into this world. Which is itself an implication that struggles come along our path to stamp our identity in this sphere? Once we treading into it, we are taught by our parents first, before we are being introduced to schools. This pandemic has given a chance to parents to affirm themselves a teacher as well. Parents have to burn the candle at both ends to cope up with their ward's studies and also with their own commitments simultaneously. Toiling is just not stopped with the parents, but extended to teachers moreover. They are also pulling out all the stops for the well - being of the students which is why they are even before the God in an age - old sequence "Maatha , Pitha, Guru , Deivam ". When lockdown have been declared, it might have been like a "Cakewalk" for the educators but actually it doubles the work of them, due to the poor internet connection,

Father of Computer - Charles Babbage

Present situation has proven itself to be the evidence for Dr. Abdul Kalam's saying " In 2020 India will become a developed nation", since students are being tutored without going to the institutions but with the assistance of technological advancement.

Nothing beyond this proverb "Old is Gold" can better annotate the education system in this quarantine. In spite of all these online classes and many webinars, just to ensure that the students' studies should not get interrupted in any way, still traditional mode of learning is applicable to all strata of students. Dolly a 10th student in the district of Raipur said that "I don't have smart phones or computers, therefore used my neighbors' phone to register on the portal. But not able to attend online classes because I could not get phone regularly. This fatal disease has not stopped with causing Virus alone, but moved ahead to the extent of pushing us to the darker side of our lives which is fear, depression and psychological imbalances. Classroom is practical and accessible to all because less than one fourth of the household have internet facility, according to the Indian government national survey. In addition telecom regulatory authority of India indicates that 78% of the Indians have mobile phones out of which 57% reside in the rural area where they encounter power supply problem. As an English literature student, I cannot stop without making reference to Interactive Hypothesis, which is the teaching method for second language, where language can be best ameliorated by interaction between the students and teachers, but when we analyze in detail, we are being enlightened by the fact that it is also deserved to teach all other disciplines as well. By cogitating all the above points, Classroom learning can be crowned for teaching. All these Technological advancements can just be gems in that crown.

- *Our alumni: RM. Bowya (2010-2012) DR. URCW.*

Father of Evolution - Charles Darwin

ONLINE EDUCATION DURING AND AFTER COVID-19

The corona virus disease has brought many challenges before us. Teachers are coping up with the challenges faced by them during online classes during the covid-19 lockdown. All schools and colleges are conducting live online classes since lockdown was announced. The virtual classrooms and digital online teaching which proves effective and gaining popularity. Teachers across the nation have been engaging the students with technology-aided teaching. Students got to know more about various apps and programs relating to online education. Their knowledge about computers, smart phone/mobile phone, radio and television are getting enhanced. Online Teaching comes with its own limitations like the availability of smart phones, laptops, computers, tabs and a good internet connection. Online teaching is an alternate tool for teaching and will never replace classroom teaching.

- KISHORE KUMAR F/O K. ANILA BERLINE

Father of Physiology - Claude Bernard

A GIRL CHILD SHOULD KNOW 8 SAFETY GUIDELINES.

CHILD SAFETY

- 1) Parents should always monitor their children.
- 2) It is best to avoid it when strangers initiate a talk or ask for an address, phone number.
- 3) 50% of child abuse assaults are committed against girls under the age of 16.
- 4) Teach your child the difference between good and bad touch.
- 5) Educate your child, not to speak to the strangers.
- 6) It is always a good idea to teach your daughter, how to defend and protect herself in any dangerous situation. It will also give her a sense of confidence.
- 7) Teach your child to prepare a plan of action mentally
- 8) If you see any crimes against children and women immediately call the children helpline- 1098 \ women helpline – 109 \ domestic abuse -181

- **J.JESIMA BEGAM, AGMHSS**

Father of Cinema - DadasahebPhalke(Dhundiraj Govind Phalke)

Is Work From Home Better Than Working In Office?

Reliable exploration has indicated that telecommuters log longer hours than their office-bound partners. Studies show that it's reasonable as there is an expanded profitability in working at home as opposed to working in an office.

Pros

- Minimize travelling time
- Involved in Family commitments
- Work sharing with family members
- Save time
- Save money
- More flexibility – avoid being tired

Cons

- Domestic distraction
 - Difficulty in separating home and work life.
 - Isolation /loneliness
- C. PRIYADHARSHINI, Department of English, Dr. URCW.

Online Class Merites et Demerits

Merits :-

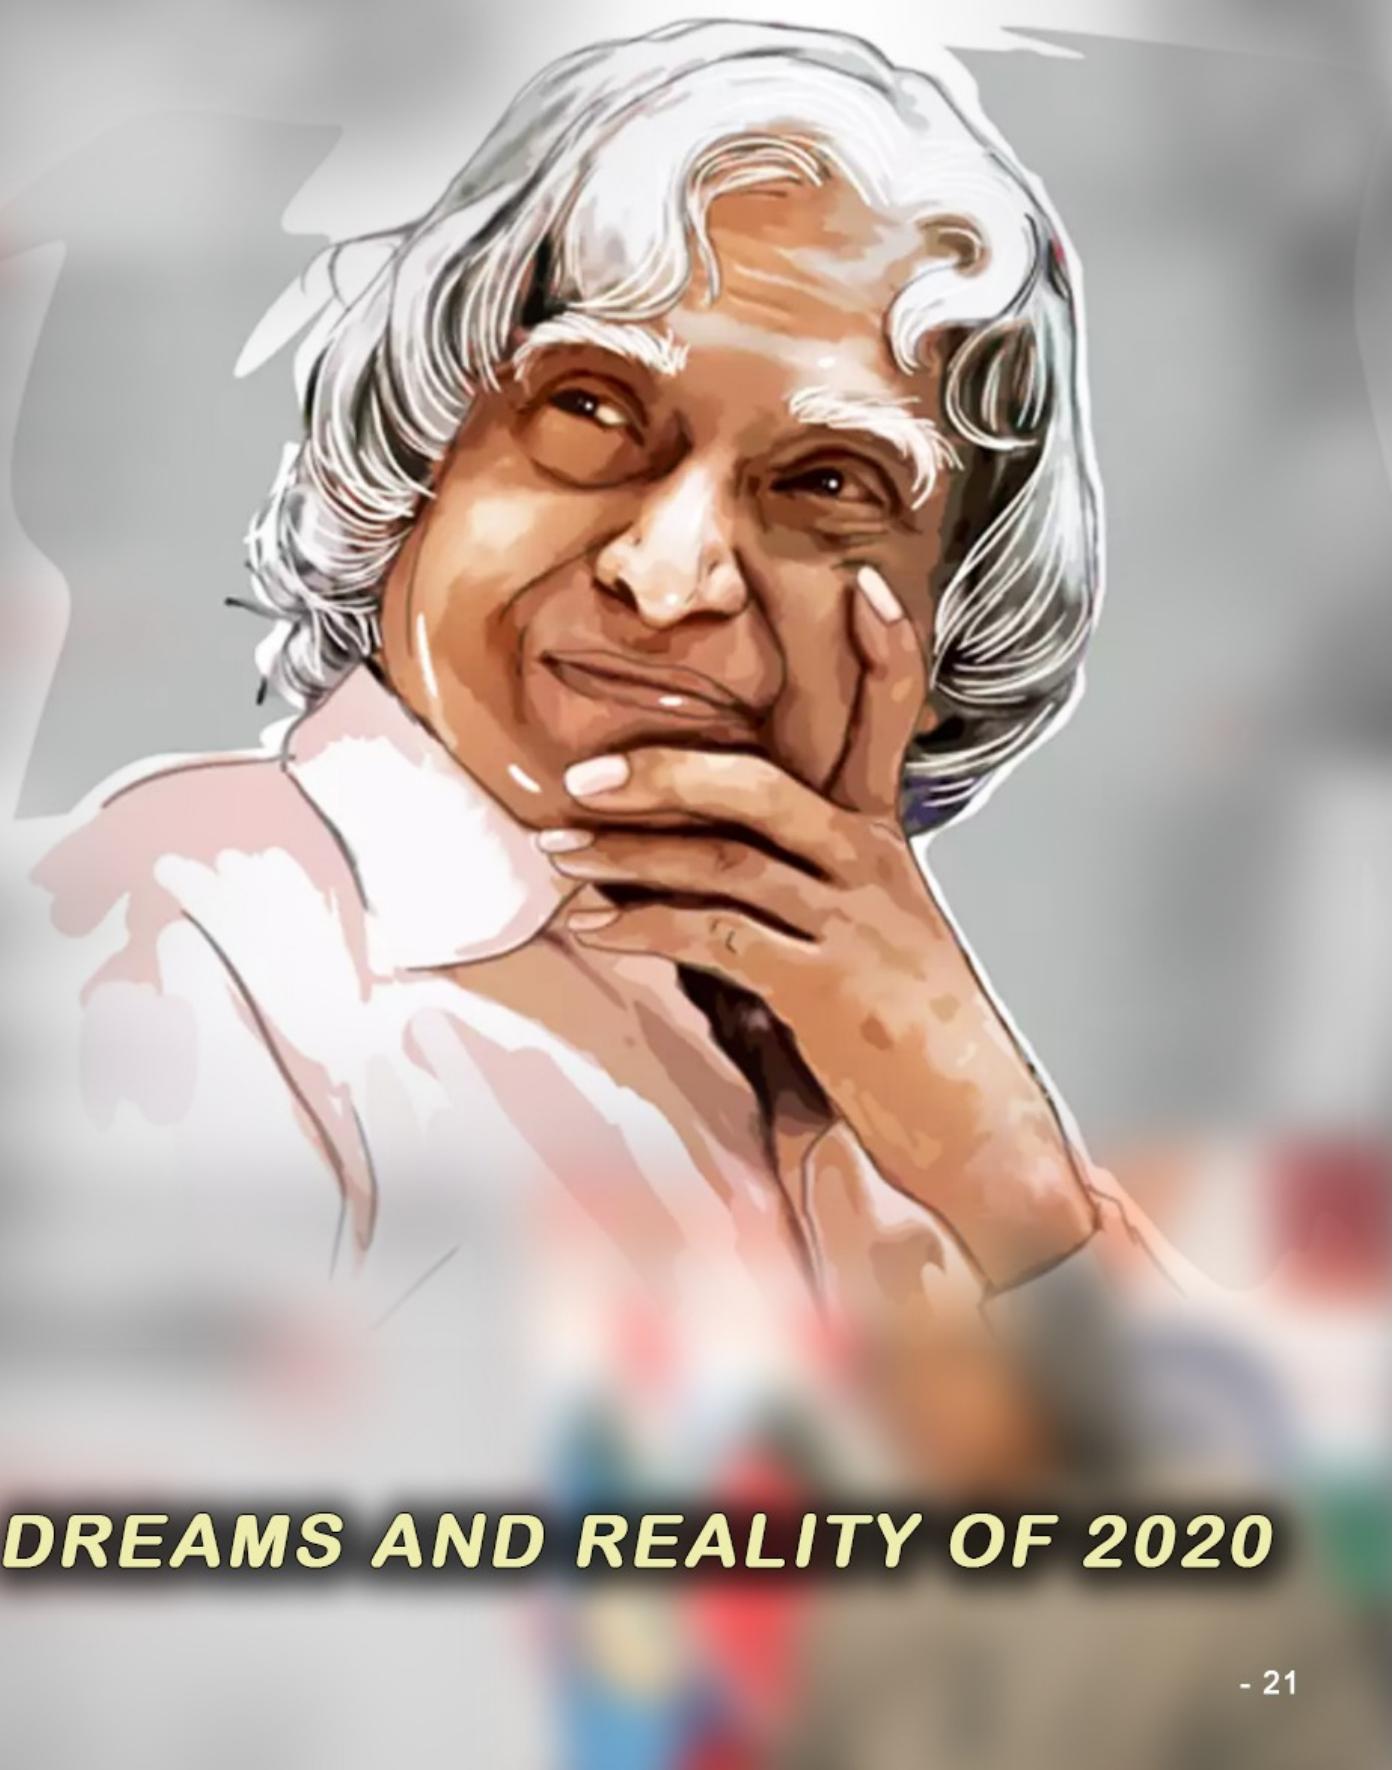

Although many people still consider traditional universities as the best way to achieve knowledge and get a diploma, online learning proves to be a great alternative. Students have changed to study on their own time and especially for free. It represents a great way to study many fields and to boost the level of self-motivation. Online learning is so effective because students can finish their homework quickly, and there is more time left to your hobbies or for finding apart time job. The advantages of online learning is: the grown up responsibility and self-discipline of the students. They have to working daily to accomplish their dreams!

Demerits :-

Online student feedback is limited. E-Learning can cause social Isolation. It requires strong self-motivation and time management skills. E-Learning lacks face-to-face communication. It is limited to certain disciplines. Cheating prevention during online assessments is complicated. Online instructors tend to focus on theory rather than practice. Lack of accreditation & quality assurance is there in online education

- T.S. Dharunika, AGMHSS

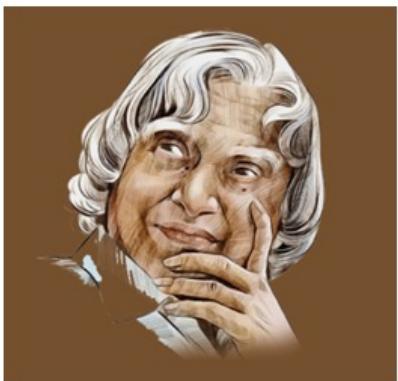

Father of Ayurveda – Dhanwantari

DREAMS AND REALITY OF 2020

DREAMS AND REALITY OF 2020

THE DREAM OF A GREAT MAN

We know that the former President of India Dr.A.P.J.Abdul Kalam had dreamed India to become a developed nation in 2020. He along with Dr. Y S Rajan had written "India 2020: A Vision for the New Millennium". And the vision is dedicated to the 10 year old girl who said Kalam that her ambition is to live in a developed India. Kalam expected India to become a developed

country in the year 2020 but did his dream come true? Not yet, but soon it will happen one day. Let us know, why India is still a developing country and what our contribution in developing our country is? A developed country is a sovereign state that is not controlled by any other country and which is independent with technologically advanced infrastructure and well developed economy when compared to other nations. Countries which are not yet developed are called developing countries. India is a developing country which means that our country is seeking to become more advanced economically and socially. India is the second largely populated country in the world. You may think what is the connection between population and development of a country? When there is larger population in a small country the Demand and Supply will be affected. Let us take an example: when there is a 100 job vacancy, the people who apply for the job will be 100,000, thus a bad competition is created here. So, population is a problem which affects the growth of our country. When we

Father of the Indian Constitution - Dr. B. R. Ambedkar (Bhimrao Ramji Ambedkar)

population, China is the country which comes to our mind because it is the world's largest populated country. Then how can China develop faster than us? It is because China is bigger than India so they do not face any problem due to population. If a country wants to develop, the people of the country should have the wealth. Countries like India where the level of poverty is relatively high have to exhibit or publicly display low values of human development. Poverty is the headcount ratio, which simply measures the proportion of the population considered to earn an income less than the standard required for basic needs. Thus, poverty is a major condition which affects the growth of India. Taxes are collected almost in every country in the world. India is also collecting income tax from the people. In modern economies taxes are the most important source of governmental revenue but, many wealthy people in India are not paying their income tax properly. The money of the taxpayers helps the country to strengthen its defence mechanism and security. The government spends our tax money on various schemes, including healthcare, education, social security, and others, which claim about 22% of the government expenditure. If the people pay the tax properly the country can grow or develop faster. Corruption affects economic development in terms of economic efficiency and growth; it also affects equal distribution of resources across the population and increases the income inequalities. Corruption erodes the trust we have in the public sector to act in our best interests. It also wastes our taxes. The people should not make the practice of corruption by bribing. To make a developed India it is our responsibility to pay taxes properly, should not corrupt and bribe, buy and promote the Indian products. If we follow this we can make Dr. A.P.J. Abdul Kalam's dreams come true.

INDIA – CHINA DISPUTE: BORDER FIGHT

QUARREL FOR LITTLE TIBET

What is the deadly India - China border dispute is about?

The relationship between India and China had been worsened over the past few months and the two world powers were faced off between each other along their disputed border in the Himalayan region.

THE DEADLY CLASH IN GALWAN VALLEY:

The root cause lies in an ill-defined, 3,440km (2,100-mile)-long border that both countries dispute. Rivers, lakes and snow-caps along the frontier mean the line can shift, bringing soldiers face to face at many points, sometimes leading to confrontation. The two nations are also competing to build infrastructure along the border is the main triggers for a clash with Chinese troops in June that left at least 20 Indian soldiers dead . In August, India accused China for provoking military tensions at the border twice within a

Father of Hydrogen Bomb - Edward Teller

week. In early September, China accused India for firing shots at its troops . India accused China for firing into the air. Both the countries established nuclear powers. The military tension at the border is mirrored by growing political tension, which has strained ties between Indian Prime Minister Narendra Modi and Chinese President Xi Jinping.

"Peace cannot be kept by force; it can only be achieved by understanding". - Albert Einstein

I hope this dispute between India and China would come to an end by a peaceful understanding.

Do you know?

There is also the potential for economic fallout, as China is one of India's biggest trading partners. Indian government recently banned more than 150 China-linked apps, including the hugely popular TikTok, citing security concerns.

End of Legendary Era

End of Legendary Era

End of musical era

S. P. Balasubrahmanyam was one of the greatest Indian singers. He made his debut as a playback singer on 1996 with Sri Maryada Ramanna. He is not only a playback singer but also a television anchor, music director, actor, dubbing artist, and also a film producer. He worked predominantly in various languages. Even though his mother tongue was Kannada he sang more than 40,000 songs in Telugu, Tamil, Kannada, Hindi, and Malayalam. He stated that "I AM ALWAYS YOUNG BECAUSE I ALWAYS LIKE TO COMMUNICATE WITH THE CHILDREN MORE". He held the "WORLD GUINNESS RECORD" for recording the highest number of songs by a singer with more than 40,000 songs. He recorded 21 songs in Kannada on 8 February 1981. In addition, he recorded 19 songs in Tamil and 16 songs in Hindi in a day, which has also been called a record. Even it is known to all that the very popular raga" To "the very popular raga "Sankarabaranam" is being popularized only after releasing the film "Sankarabaranam" in which he sang "Om Kaara Nadhanu, a popular song in Sankarabaranam raga. His "Ragangal Padhinaru" song is very familiar because the history of ragas are beautifully compared with a Lady. The song is in the raga "Aabheri". Apart from the cine songs he also sang many carnatic songs. He sang

Father of Geometry –Euclid

Lingashtakam, and many more devotional songs like "Hara harashivane". He won six National Film Awards for Best Male Playback Singer for his works in four different languages: Telugu, Tamil, Kannada, and Hindi. He won six film fare awards south. In 2012, he received the state NTR National Award for his contributions to the Indian cinema. In 2016, he was honoured with the Silver Peacock Medal as Indian Film Personality of the Year. He was a recipient of the Padma Shri (2001) and Padma Bhushan (2011) from the Government of India. Even he didn't know Carnatic music much but still he created a history. Unfortunately he was affected by COVID-19, when he travelled for the music show, which had the maximum capacity of breathing. His death marked the end of an era.

“இந்த தேகம் மறைந்தாலும் இசையாய் மலர்வேன்”

Science and Technology

THE DEVIL's TRIANGLE:

This article deals with the mysteries around the loosely defined region in the western part of the North Atlantic Ocean. This particular area is called "The Bermuda Triangle". This is famous for the missing Ships and Airplanes along with dare devil stories. These mysteries attracted

story writers and even directors to its side. People's idea about this place is quite terrific, they say, this place was once ruled and governed by the Greek sea god "Poseidon". The Ships sink and the Planes disappear because of his curse, etc., but the voyager Christopher Columbus states that during his voyage through Bermuda triangle, he witnessed a huge beam of light (may be a meteor) and a huge noise after two weeks. And the most interesting part is the great dramatist Shakespeare's work: "The Tempest" is based on the Bermuda triangle, which makes it more interesting. Till 20th century, the missing Ships did not get more attention from people worldwide. The attraction was the disappearance of the biggest US Navy Ship "The US Cyclops" which held 10,800 tons of manganese with 309 crew members' onboard .The Ship, its crew, the manganese, all gone. The American president, Woodrow Wilson says, "Only God and the sea know what happened to Cyclops". The paranormal writers say it is because of aliens, atlantis, sea monsters, time warps, reverse gravity, etc., which is enough to make people buy their books but the scientific writers believe it may be because of magnetic abnormalities, water pouts, huge eruption of methane gas etc., but the government brought it to the knowledge of scientists, which made it more interesting for the people to follow. They

Father of Modern Finance - Eugene F. Fama

experimentally proved the possibilities for the formation of huge waves up to 1000 ft high due to the alignment of Bermuda. That was not enough to solve the cases. So, the government asked them to dig deep. The scientists did and found two more reasons: They are - magnetic abnormality due to the presence of magnetic rocks in Bermuda and also the emergence of huge sink hole due to tectonic disturbance but none of this helped to solve the cases so far. Bermuda triangle remains a mystery, still!

- R.SRILEKHA, Department of English, Dr. URCW.

Father of Modern Finance - Eugene F. Fama

SPY TOOTH

Do you know about spy tooth?

Mr. James Auger has devised a new concept in secret communication - an audio tooth implant. A surgeon implants a device into your tooth. The data is retrieved from a cell phone, radio or computer and the vibrations resonate through your jawbone to your inner ear bone, meaning that only you can hear the information...

SAY NO TO PLASTICS

1. Moreover plastics are harmful for marine life. Micro Plastics (5mm) are more harmful for humans.
2. Micro plastics are mixing in the ocean - seabirds, marine animals are getting affected day by day.
3. Experts predict that 99% of seabird species will have ingested micro plastics by 2050.
4. Use reusable bottles and avoid using single use plastics.
5. Live naturally, if you have plastics then use those to create craft to decorate home.
6. Firstly it looks difficult to live without plastics but try to avoid in your day to day life. #Avoid plastic usage.

- B. RESHMA SHALINI, DEPARTMENT OF ENGLISH, DR. URCW.

Father of Humanism - Francesco Petrarca

Genetically Modified Seeds

A green planet is a happy clean planet!

In the current kharif season, farmers would undertake mass sowing of GM seeds for maize, soya bean, mustard, brinjal and herbicide tolerant (Ht) cotton, although these are not approved farmers carried out a similar movement last year, too.

Conventional plant breeding involves crossing species of the same genus to provide the offspring with the desired traits of both parents. Genetic engineering aims to transcend the genus barrier by introducing an alien gene in the seeds to get the desired effects. The alien gene could be from a plant, an animal or even a soil bacterium.

But cotton, the only GM crop that is allowed in India, has two alien genes from the soil bacterium *Bacillus thuringiensis* (Bt) that allows the crop to develop a protein toxic to the common pest pink bollworm. HtBt, on the

Father of Eugenics - Francis Galton

cotton is derived with the insertion of an additional gene, from another soil bacterium, which allows the plant to resist the common herbicide glyphosate. In India, the Genetic Engineering Appraisal Committee (GEAC) is the apex body that allows for commercial release of GM crops. In 2002, the GEAC had allowed the commercial release of Bt cotton. More than 95 per cent of the country's cotton area has since then come under Bt cotton. Use of the unapproved GM variant can attract a jail term of 5 years and fine of Rs. 1 lakh under the Environmental Protection Act, 1989.

In the case of cotton, farmers cite the high cost of weeding, which goes down considerably if they grow HtBt cotton and use glyphosate against weeds. Brinjal growers in Haryana have rooted for Bt brinjal as it reduces the cost of production by cutting down on the use of pesticides.

Unauthorized crops are widely used were as Industry estimate says that of the 4-4.5 crore packets (each weighing 400 gm) of cotton sold in the country out of which 50 lakh are unapproved HtBt cotton.

Haryana has reported farmers growing Btbrinjal in pockets which had caused a major agitation there. In June last year, in a movement led by Shetkari Sanghatana in Akola district of Maharashtra, more than 1,000 farmers defied the government and sowed HtBt cotton. The Akola district authorities subsequently booked the organizers.

Environmentalists argue that the long-lasting effect of GM crops is yet to be studied and thus they should not be released commercially. Genetic modification, they say, brings about changes that can be harmful to humans in the long run.

Father of Scientific Management - Frederick Winslow Taylor

The Sanghatana has announced that this year they are going to undertake large-scale sowing of unapproved GM crops like maize, HtBt cotton, soybean and brinjal across Maharashtra. Farmers who plant such variants will put up boards on their fields proclaiming the GM nature of their crop. Anil Ghanwat, president of the union, has said this action will draw attention to the need for introduction of the latest technology in the fields. He said farmers will not be deterred by any action taken against them by the authorities.

Finally, if insects are dying then that is the same case for us.

ELON MUSK THE REAL HERO

"I could either watch it happen or be a part of it."

While everybody is yet questioning whether a man truly stepped in moon, here comes a man whose solitary dream is to send human to Mars. Each one snickered at him while he uncovered his fantasy but, today he has become the good example, motivation and hero for some youth. He is Elon Musk, he has been accomplishing this undertaking and as of late he had sent his two space travellers to the Mars and brought them back securely. None had done this previously. In any case, even after his ten years of failure, he never abandoned his fantasy; lastly accomplished what he dreamt!

"I think it is possible for ordinary people to choose to be extraordinary."

THE POWER OF SOCIAL MEDIA

"The power of Social Media is, it forces necessary change in us." However, in the middle of COVID pandemic all the bad news coming in. Here's the beautiful story of how you can make a difference using social media. It restores faith in humanity and in social media as well. An elderly 80 year old couple from, Malviya Nagar has been making their livelihood threw the small stall to run their daily life. They had been doing this for 30 years but during this pandemic, nobody came to eat or buy anything at their stall. So, due to the lack of customers, the old couple was affected economically. They didn't have any income to run an ordinary life. And here comes the turning point to the old couple's life. A food blogger visited their stall and understood their situation and made a food blog video about their stall. This video became viral on social media even the celebrities started sharing the video under #Babakadhaba. And now, the stall is filled with lots of customers visiting to help them by buying their food. This proves and restores faith in humanity. As a coin has two sides, likewise social media also has both good and bad - let us take the positive side of it...

"Not someone can help everyone, but everyone can help someone".

- C. PRIYADHARSHINI, Department of English, Dr. URCW.

THEY TOO ARE HUMAN

SHE WAS NOT A
GAYSTRAIGHTBUTTRANSGENDER BUT A HUMAN

"First they ignore you, and then they laugh at you. They fight you and then you win".

- Mahatma Gandhi.

A few days before, I was travelling in a bus with my mother and aunt. My aunt was a mother of a new born baby. It was a noon time. We were getting on the bus at 2:30 pm. It was a three seated bus. At that time we noticed that each man in the bus was occupying the window seats. Remaining was vacuous. We felt helpless to carry a young baby in the moving bus. And no one seemed to consider our feelings because some of them were listening to music and the others wanted their comfort zone by occupying the window seat. At that time we saw a person in the form of divine. She was a transgender. She noticed the thing that was happening in the bus. Her boldness made me to aspire on her. She asked a man in one of the three seats to sit with other men in the other seat. Here, humanity won. The male and female think that we are perfect with all the qualities of men and women. But we are not complete in the form of human because, a human is incomplete without humanity. As a human she won. But the rest lack, humanity and they did not deserve to be human. I am not saying that

Father of Aviation - George Cayley

many of them were unwilling to sit near those transgender people. They are not untouchables; they are the people who don't possess reproductive quality. There is no other reason apart from this to treat them in a worse manner. People think that they are bisexual and some are sex workers. The persons who force them to involve in this process are culprits and we should treat those as untouchables. We should not believe things blindly. We should learn the truth behind things happening around us.

Be a human filled with humanity. Transfer your blind thoughts into eyed emotions on them.

- Sangamithra Muthukkumar, Department of English, DR. URCW.

Father of Railways - George Stephenson Father of Genetics - Gregor Mendel

PROMOTING FELLOW FEELING

Few years before, Samyukthaa was a girl studying in 11th standard. She was refused by all her classmates because of her backward community whereas others are from high caste. They tease to irritate her. They won't share their food, snacks with Samyukthaa. They won't touch her books, notes, etc...but Samyukthaa was very strong. She never scorned for being born into backward society. She won't take any notice of her classmates' rude behaviour because she wants to achieve a great position in her life. She concentrates in her studies and she scores high marks in her public examination. A few years later the classmates who criticized her and her caste were sitting below the stage. The girl who was strong and confident in her goal was on the stage as a collector. (As Chief Guest).

Moral of the story...

"When a coward met an obstacle he destroys himself;
If a courageous met an obstacle he destroys the obstacle"

Father of History – Herodotus

Humans may be divided by caste and religion by some heartless idiots. Never feel shame about your caste either higher or lower, it doesn't describe your knowledge, talent and destiny.

Dr. Ambedkar was born in a backward community. He feels proud to be born in the backward community. He made all his obstacles into achievement. Even though he was refused by all his classmates and some of his teachers, he created his own magic in his life. So, we still remember him as the "Father of Indian Constitution"

Think positively because "your thoughts are incredibly powerful; choose yours wisely."

Now it is our duty to create a country without caste discrimination:

"There is only one caste.....

 The caste of humanity!

There is only one religion.....

 The religion of love!!

There is one language.....

The language of the heart!!!"

PROFILE BUILDING

Honouring your parents

- First, you must understand the needs of your parents.
- The younger you were, the more you depend on your parents.
- But, as you grow older, you need their experience and wisdom.
- You are never too big to ask your parents their advice even in personal matters. Sometimes, it is embarrassing for yourself, but understand your parents know you much more than you think.
- Accept their guidance.
- If they are not competent in certain matters, they will advise you to whom to go.
- Whatever may the circumstances, always try to satisfy them and make them happy.
- Nothing gives them more joy than to thank them for what they give you and especially for what they are.
- Your parents are now strong, but as they grow older, they expect you to help them.
- There will come a time when you are strong and independent while one or other of your parents will be weak and helpless. You make sacrifices to help them when old and dependent.
- You must remember that the family is the smallest cell of a society. The quality of society depends on the qualities of the family.
- The family also is the first school of every individual and a school that lasts for life. For, where there is love, the other values and good qualities will thrive.
- Where there is no love, it is a breeding ground for vices and evils.

- B.V.NASRIN BARGANA, Department of English, DR. URCW.

Be a responsible citizen

- 1) A good citizen is always ready to help his fellow beings.
- 2) In every situation, he does his duty unmindful of the gain or loss to himself. He is always ready to do a good deed.
- 3) You can do so many things for the good of others.
- 4) Be a responsible citizen. If you are walking along the road and you see an accident in which men are injured, you must at once take them to hospital where they may be in a better position to give assistance to the injured.
- 5) A stray dog enters your garden. There's a collar with its owner's name on it. You should at once restore it to its owner.
- 6) Sometimes, you may see a purse or something valuable, lying on the road. You must at once pick it up and deposit it at the nearby police station.
- 7) While walking along a road, you may see a public tap opened with water running from it. It is your duty to close it tight. This way, you will save a lot of water.
- 8) Many a time to find the lights in your house turned on even when there is no one around. You must at once switch them off. Thus, you save a lot of wastage of electricity.
- 9) Being a responsible person means to be bodily alert and mentally agile.
- 10) You must be able to think as to how you can help others.
- 11) Anybody who learns to do all these things will become a fine young person.
- 12) So, if you want to serve your country truly, you must learn to do your duty at all times.

B.V.NASRIN BARGANA, DEPARTMENT OF ENGLISH, DR. URCW

ANGER MANAGEMENT

Nowadays, people suffer from Anger. Here are some tips to manage your anger:

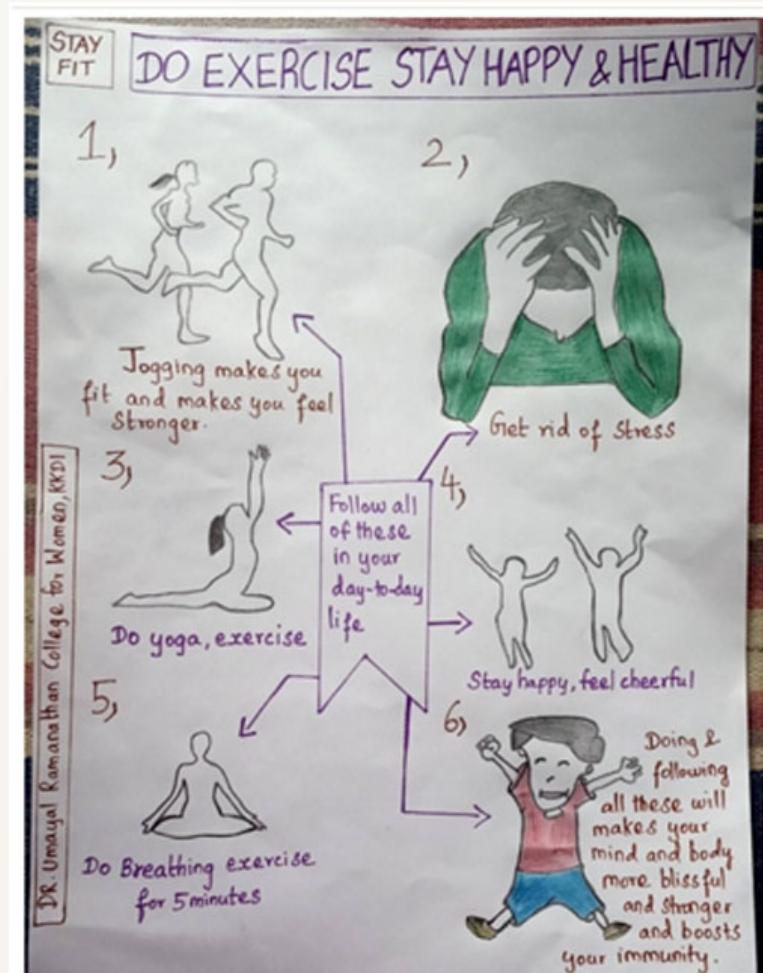

- In the heat of the moment, it's easy to say something you will later regret. Take a few moments to collect your thoughts before saying anything and allow others involved in the situation to do the same.
- Physical activities and yoga can help reduce stress. . If you feel your anger escalating, go for a brisk walk or jog or spend some time doing other enjoyable physical activities.
- Count down or up to 10. If you are really mad at anger start a countdown.
- Let listing to music carry you away from the hard feelings. Put in your ear buds or slip out to your car. Crank up your favourite music and hum, bop or sashay your anger away.
- Don't stew in the events that made you angry. Help yourself process what happened by talking with a trusted, supportive friend who can possibly provide a new perspective.
- Nothing upends a bad mood like a good one. Diffuse your anger by looking for ways to laugh, play with your kids.

A minute with a Paediatrician

Interview with Dr.Sivakumar, MBBS, DCH, DNB (Ped)

1. Why did we start to observe infant protection day?

Nurturing an infant requires lot of skills and knowledge, especially for first time parents. Lack of this knowledge is one of the important cause of diseases and problems infant face. The main aim of Infant protection day is to try and impart this knowledge to parents.

Father of Architecture – Imhotep

2. Give the importance of the colostrum and tell us, is there any supplement for that.

Colostrum is the most important food for a new-born. Colostrum and breast-milk not only contain carbohydrates and protein, but also have many biological factors like antibodies against microorganisms, etc. No supplement can match the breast-milk.

3. Easy way to make child stick to food in healthy manner:-

- Avoid beverages and junk foods - especially chocolates and biscuits.
- Avoid mobile phones, tablets and TV.
- Feeding the child after he/she feels hungry, thereby preventing overfeeding.

4. What are reason increases of juvenile delinquency case according to 2020?

- Overuse of mobile phones.
- Cinema and TV show portraying anti-social activities in an attractive way.
- Teaching about humanity is not an apart of school education.

5. Is coding classes is safe for children? Won't it affect their mental state?

Coding classes may be useful for children more than 14 years of age. For younger children, coding classes increase the burden of budding brain. For them, more physical activity oriented classes like swimming, etc., should be included.

6. How does parent's anger affect their child?

Negative reinforcement activities like punishment, shouting at the child will either make them more adamant or more afraid of the parents and child may stop sharing their personal feelings to parents. Positive reinforcement activities like giving gifts if child does what parent expects is the best way of nurturing good habits.

Father Of Radio Science in India - J C Bose

7. What do you feel when a 10 year-old child having their own Android mobile?

Android phones are bad even for adults and more so for children. It results in eye strain, mental strain, lack of physical activity, etc. It's one of the main reasons for increasing childhood diseases.
